Java

```java
class Solution {
    public int snakesAndLadders(int[][] board) {

    }
}
```

JavaScript

```javascript
/**
 * @param {number[][]} board
 * @return {number}
 */
var snakesAndLadders = function(board) {

};
```

C++

```cpp
class Solution {
public:
    int snakesAndLadders(vector<vector<int>>& board) {

    }
};
```
